RTM Change [ ] **Start New Baseline** [ ]

Problem
The UIL Compiler on IRIX 6.2 is needed for Client Subsystem custom code. The Motif environment is the baseline for all platforms however SGI has opted to NOT include the UIL compiler as part of the DEFAULT installation of the OS. The UIL compiler is one of several sub-products of the Motif development products for IRIX 6.2.

Proposed Solution
Install the UIL Compiler on the following systems for Client Subsystem custom code compilations.

- "CREE"
- "CHEROKEE"
- "COMANCHE"
- "SCULLY"
